Plans to build a 'destination' public sculpture at the multi-million pound Kirkstall Forge development in West Leeds have been submitted.

Applicants GMV Twelve Limited want to erect a sculpture – called Cusp – in front of the Number One office block at **Kirkstall Forge**, near the train station.

In a planning statement submitted with the plans, artist Elpida Hadzi-Vasileva said: "Cusp aims to act as a destination for visitors; offering a robust but natural-looking marker in the landscape, as well as narratives that can be read and re-read in diverse ways.

"It is an iconic form that entices the visitor, encouraging people to use their own imagination, both from a distance as well as in close proximity to the work."

The plans, at Great Exhibition Way, include soft and hard landscaping.
